JOIN US TO LEARN MORE ABOUT

- What's going on with the Sustainable Groundwater Management Act (SGMA) in your area
- What the State Board probationary process means and how it affects you
- The status of revised Kaweah Subbasin Groundwater Sustainability Plans
- What local projects and new programs are moving forward to reach groundwater sustainability
- How you can support efforts to keep local control over groundwater management

For more information about the event visit ekgsa.org/rsvp

The Kaweah Subbasin includes the East Kaweah, Mid-Kaweah, and Greater Kaweah groundwater sustainability agencies (GSAs). The Kaweah Subbasin GSAs are coordinating to comply with the Sustainable Groundwater Management Act (SGMA), a California law. Their goal is to keep local control over groundwater. Leaders and landowners in the Subbasin have put in a lot of hard work coordinating to revise the GSAs' Groundwater Sustainability Plans to address State requirements and prevent the area from going into probation (falling under state control). Attend the event to get updates on the state of the Kaweah Subbasin and learn about the ongoing efforts to continue managing groundwater under local leadership.
