2025 True-Up Invoices Due Date

True-Up Invoices are invoices sent once all water supply data is accumulated into the Water Dashboard. Invoices analyze if a water account exceeded groundwater pumping allocation or if the groundwater pumping exceeded the Cap (3 ac-ft/ac). Invoices with \$0.00 charge due did not surpass the allotted amount of groundwater. Invoices with greater than \$0.00 charge due exceeded the groundwater allotment and went into Mitigation Tier and/or Penalty Tier.

Reservation Invoices are invoices sent toward the beginning of each Water Year after the True-Up invoice of a previous year. It 's sole purpose is for the purchasing of Tier 1 & Tier 2 allocation. The formula used for calculating the Reservation invoice is: Acreage x Allocation (ac-ft/ac) x Rate (\$/ac-ft) = Charge (\$)
